## Classes

### Matter composition<sup>c</sup>

**IRI** <http://w3id.org/CEON/ontology/product/MatterComposition>

**Description**

A product composition is the composed information of a product in terms of a specific component, in which such a component is also a matter.

**Sub Class Of**

[resourceODP:Composition](#)

**In Domain Of**

[associated with matter](#)<sup>op</sup>

**Restriction**

[associated with matter](#)<sup>op</sup>  
*exactly* 1 [Matter composition](#)<sup>c</sup>

## Product model<sup>c</sup>

---

### IRI

<http://w3id.org/CEON/ontology/product/Product>

### Description

Represents the common sense notion of a product, i.e. the abstract notion of a product type or product model, which is a model that is used for manufacturing products.

### In Range Of

[associated with product model<sup>op</sup>](#)  
[batch of products<sup>op</sup>](#)

**IRI** <http://w3id.org/CEON/ontology/product/ProductObject>

### Description

A product object is a physical object put into a market for sale, i.e. corresponding to the notion of an item, which conforms to the abstract idea of a product model. The product can be a thing that grows naturally or produced through some chemical or manufacturing processes.
